**Where
Every Student
Shines!**

I look forward to helping middle school students develop their faith and succeed in math as I begin my teaching career at Catholic East.

I received my Bachelor's Degree from Marquette University with majors in Elementary Education and Mathematics for Elementary School Teachers. I am originally from Oak Lawn, Illinois where my two younger sisters and parents live. My sisters and I have attended Catholic elementary and secondary schools in Chicago.

I love to read especially outside in the summer. I enjoy baking, exercising, volunteering, playing tennis, and traveling. I love spending time with my friends and family.

In religion classes, I look forward to helping 6th, 7th and 8th graders develop their faith and having discussions to help them grow as Catholics. Also, my favorite subject is math and I want to show students that each of them can be successful in math.

I am also very excited to be the 7th grade homeroom teacher!
